

HOW TO SETUP YOUR ACCOUNT

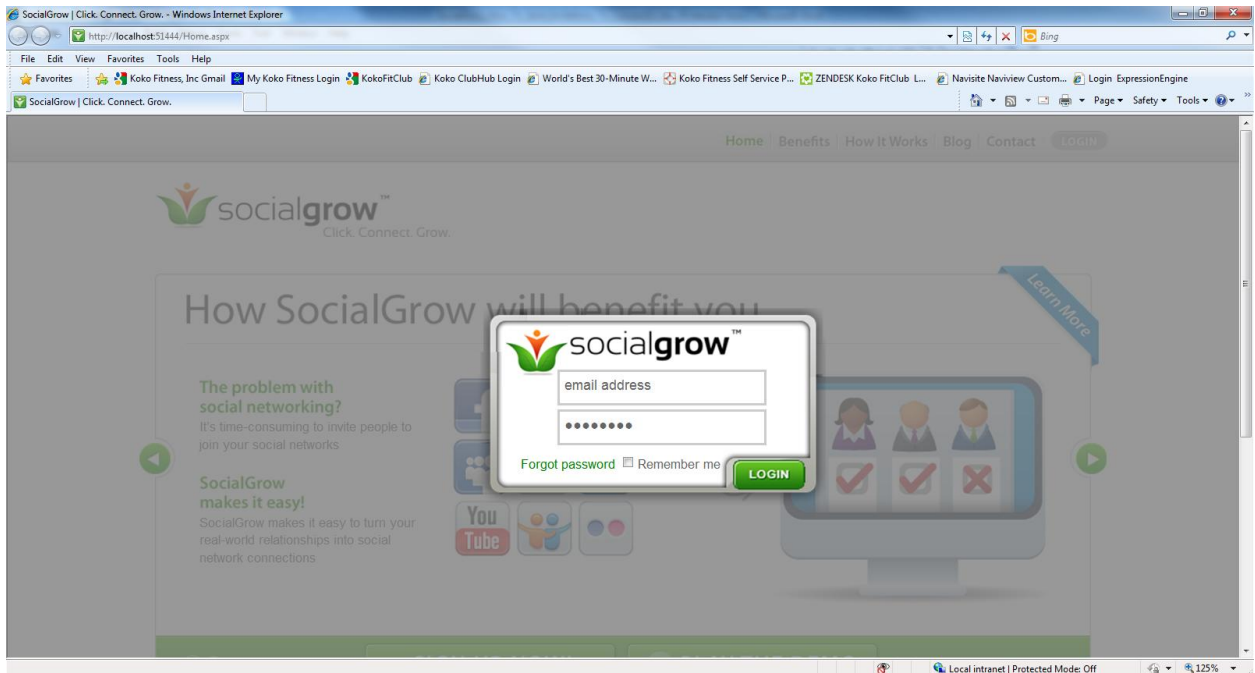

SocialGrow's application is the easiest way for you to grow your social networks.

By tapping into your live e-mail streams, SocialGrow transforms your real world relationships into social network connections.

SocialGrow is currently compatible with LinkedIn, Facebook, Twitter, and MySpace, with more social networks coming soon.

How do I send invitations to connect using SocialGrow?

1. Log into SocialGrow by typing your registered email address and password into the login text boxes in the popup window after you click Login button in the upper right corner.

2. When you click on Potential Connections, you can begin sending out invitations to connect to people who have emailed you.

You have 201 potential connections!

Enter a friend's email address INVITE TO CONNECT

If you were at a networking event and you have business cards of people you met to connect with, simply type their email address in the text field in the upper right corner and click the orange "Invite To Connect button"

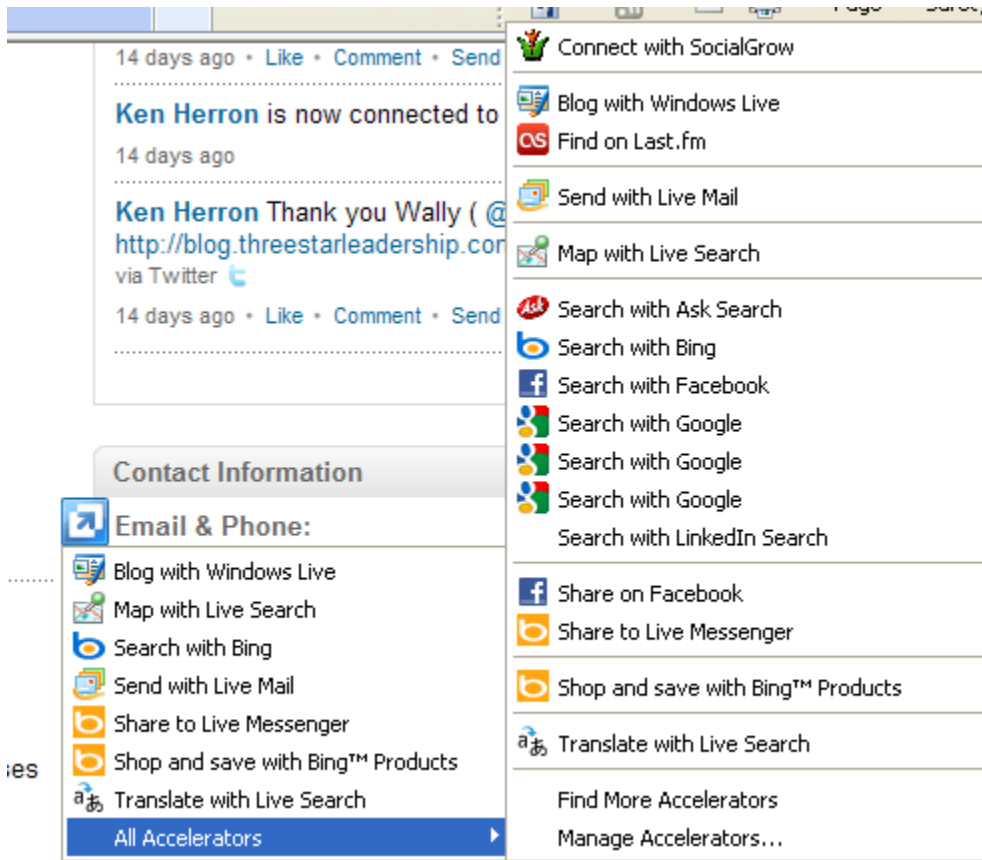

Then type in their first name and last name in the queue and send them an invitation to connect.

To use the SocialGrow Internet Explorer 8 / Windows 7 accelerator, simply highlight an email address and click on the little blue box with the arrow in it.

Next click on All Accelerators and then click Connect with SocialGrow. This will add the email address to your Potential Connections queue so you can invite them to connect the next time you log in to SocialGrow!

We protect your e-mail and social network information!

A Microsoft BizSpark startup, SocialGrow uses GoDaddy's SSL for all of our data transfer and encrypted storage.

The SocialGrow application does not read, access, or store any of your e-mails' content.

HAPPY CONNECTING!!
